Preface

These are the Final Proceedings of the Second International Workshop on Bounded Model Checking (BMC'04), which is affiliated to the 16th International Conference on Computer-Aided Verification (CAV'04) in Boston, MA, USA. The workshop took place immediately after the main conference on Sunday, July 18, 2004, and besides the presentations of the papers collected in this volume also featured an invited talk by Bart Selman. Out of 9 submissions the program committee selected 6 papers, which after the workshop have been collected to be published electronically in this special volume of Electronic Notes on Theoretical Computer Science (ENTCS).
